In the contest for the children Freda Johnson and Charles Grindle were the winners and Dan Heister in the men's contest. The ladies served a beautiful supper to which the guests did full justice. The evening was pleasantly spent in playing games and contests.

Miss Alice Platt is learning the dress making trade with Mrs. Gunn in Salem.

Rev. Henry Voegtli resigned as pastor of the Washingtonville Lutheran charge. The resignation will likely take effect April 23. He received an urgent call to Davenport, Neb., but will not accept immediately.

Prospects for paying of the Government road tax which goes through Washingtonville look brighter now.

When the improvement was first considered some two years ago the road law of the state was such that this village was responsible for the paving within its corporate limits and difficulty ensued because we had already reached our bonding limit. Now, however, either the townships or the counties interested in the county line road can levy funds for the village improvements. It is understood, the Cass law removing this obstacle.

While no definite decision has been reached the favorable attitude of the trustees of Salem and Green townships is believed by those interested to indicate that at least two miles and possibly all of the unimproved section between Salem and Fairfield township will be paved this summer.

MR. HEROLD'S HAPPY HITS

An apple a day
Keeps the doctor away,
And an onion a day
Keeps everybody away.

Those who have not trimmed their grapevines should do so at once, or else they will have to be content with elderberry wine next winter.

Birds are mating and building their nests. It is amusing to notice the home nest in which to rear the family.

Autos are becoming so numerous that a repair shop is needed at nearly every cross roads. Farmer boys will do well to send away for a few tools and material to start into the repair business.

I am glad to notice that serum for the prevention of hog cholera has been greatly reduced in price by the O. S. U. at Columbus.

A "county agent" to tell farmers how to grow crops is a new fact for many of the adjoining counties. If the works in harmony with the granges he will be a valuable adjunct to agriculture in all its branches.

Cyrus P. Fisher of Leesville, this county, patented a process for retarding the blooming of fruit trees by packing into "Pop-corn" in the last issue of the Ohio Farmer.

The Carroll Chronicle entered upon its 46th volume last Friday with an extended sketch of its history since its first issue on the 24th of March, 1871.

M. E. Church of this place was filled to its capacity Friday night to hear the musical entertainment given by the Salisbury family composed of ten members; father, mother, four sons and four daughters. Some of the fogies once present didn't like it because they said the roomed in father's house into a place of merchandise.

School teachers who practice domestic science by serving hot lunches to their pupils who bring their dinners in baskets have better results on ex-memorizing.

It is encouraging to read of the satisfactory settlement being made between coal miners and operators. The miners get an advance of 3 cents a ton, while the operators have advanced 25 cents a ton in consumption.

Some of the schools throughout Ohio are assuming city airs, but the pupils don't appear to get these "high costs of living." I venture to state that Miss Marie Weltweit has more satisfactory results at No. 8 in Green township than many of the high school graduates in the city.

I have not heard of any maple sugar camps being opened in Carroll county this year, and the indications are that there will be none.

We need a few Yankees or Pennsylvanians to come to the county line road to plant onions, lettuce and peas. Boys have been found with horseradish and beets.

Edmond Vance Cook gave the closing lecture of the course for the Carrollton High school last Friday night. The admission was 50 cents for the lecture, and \$2 a plate for the supper that followed. The proceeds of the lecture were used to defray the expenses of the basketball team in its jaunt to Columbus, Delaware and other cities. Clark Firestone of Lisbon was present and made a speech in furtherance of his candidacy for congress.

Clark never loses a chance to air his oratory.

Delroy is undergoing a mining boom. From recent tests in that locality it has been demonstrated that a 4 1/2 foot vein of coal extends from Delroy to Wayne, a distance of ten miles. A tunnel is being erected near the railroad station at Delroy, and if all goes well there will be shipments of good coal before midsummer. They expect to make rooms for at least 300 miners. Washingtonville miners would do well to appoint a committee to visit this new opening and report the result of their findings.

Our town's boys who work at the pottery or have a cheap clerkship in one of the stores spend their evenings at the skating rink, the dance hall or at the "movies," then take their girls to an ice cream parlor. On Sunday they walk to the country with a kodak and return home "loaded" with pictures of scenes by the wayside. Thus they put in their time, and when they are out of a position they c. o. d. (call on dad) for a living until something else is in sight.

Production of pecans in the United States has more than trebled in the last ten years.

Sid Brain writing from Iowa Center, Wyoming, says: "As most people in the locality know I used to mine coal in Washingtonville. When I left there I came here and took up a homestead. Last summer I raised 1400 bushels of wheat, 150 bushels of oats and 150 bushels of corn. This is better than digging coal. My land is level enough to run an automobile any place and there is not a ditch on the 320 acres." This is quite different from Lawrence Callahan's experience in Florida and Cuba. After his return to Salem he said he was particularly impressed with agricultural conditions in Florida, but found some of the fruit displays attractive. He visited one of the large strawberry shipping points and saw the natives bringing in their crop for shipment north. The growers are obliged to use from \$15 to \$100 worth of commercial fertilizer to the acre. The Florida "razor back" hogs were quite a sight. Mr. Callahan saw a smoked ham that he says was as flat as his hand and weighed but six pounds and to the native cattle they are anything but desirable. "Never in my life," he says, "did I ever see such poor cows." The Cuban farmer he found about the laziest mortal on earth, content to plant his crop and trust to luck for a harvest. The land does not produce it is not taxed. Cock fighting is the chief sport, of which every native Cuban is a great devotee. Mr. Callahan owns a fine orchard near Lisbon.

MILLVILLE
